FOR MYSORE STATE

[Despatch Abstract.]

G.O.No.2975 31st July 50	Postwar Development - Industries - Manufacture of gland products - Provision of cold storage facilities in Municipal Slaughter houses for preservation of animal tissues - Papers -Recorded.

No.DC2/26/1/49-Pt.II.1825.
DIRECTORATE GENERAL OF INDUSTRIES AND SUPPLIES.

New Delhi, the 24th February 1950.

To

The Chief Secretary to the Govt. of Madras.
MADRAS.

Sub:-Development Committee for Tar products, Fine Chemicals and Pharmaceutical Industry meeting held on 2-7-49.

--

Sir,

I am directed to say that it has been represented to the Government of India by the Indian Chemical Manufacturers' Association, 23-B Netaji Subhas Road, Calcutta, that there are no Cold Storage facilities at the Municipal Slaughter houses for collecting glands and animal tissues. Existance and expansion of the glandular products industry largely depend upon the development of the collection and refrigeration facilities in the different slaughter houses. It is estimated that if glands and derivatives were saved from all the animals slaughtered, there would be an abundant supply of various medicinal products such as Thyroid, Pituitary extracts, Liver extracts etc. The manufacturers feel that the municipalities of important towns should be persuaded to set up cold storage facilities in order to enable collection and preservation of glands and animal tissues on a hygienic basis.

The above representation is brought to your notice for any action you deem fit.

Sd/- P.Das.

GOVERNMENT OF MADRAS
LOCAL ADMINISTRATION DEPARTMENT

--

Memorandum No.29152-50-3H, dated the 28th December, 1950.

--

Sub:-Slaughter Houses. - Municipal Councils - Installation of refrigerators for preservation of animal glands and tissues Municipal Councils advised to afford facilities.

--

It has been represented by the Indian Chemical Manufacturerers Association, Calcutta that there are no cold storage facilities in the municipal slaughter houses for collecting and preserving animal glands and tissues. It has also been represented that the existence and expansion of the glandular products industry largely depend upon the development of the collection and refrigeration facilities in the different slaughter houses and that if glands and derivatives were saved from all animals slaughtered, there would be an abundant supply of various products such as Thyroid, Pituitary extracts, Liver extracts etc. The manufacturers feel that the municipalities of important towns should be persuaded to set up cold storage facilities in order to enable collection and preservation of glands and animal tissues on a hygienic basis.

2. The Indian Tariff Board also has in its report on the Liver Extract Industry recommended that the municipalities should maintain proper hygienic conditions in their slaughter houses and that the possibility of providing cold storage facilities in the slaughter houses from which raw liver is supplied for the liver extract industry, should be examined.

3. It has been understood from certain municipalities that there is no demand for the glands and animal tissues available in the slaughter houses. In view of this fact and in view of the present poor financial position of local bodies it is considered not profitable for the municipalities to provide cold storage facilities in their slaughter houses at their cost, but that they can allow the manufacturers of glandular products to set up cold storage facilities of their own in the municipal slaughter houses The Commissioner, Corporation of Madras and the executive authorities of all Municipal Councils are requested to afford all facilities to the manufacturers of glandular products who wish to instal their own refrigerators in the municipal slaughter houses.

J.Sivanandam,
Secretary to Government.

To The Commissioner, Corporation of Madras through the Mayor.
To the Executive Authorities of Municipal Councils through the Chairman, Municipal Councils concerned.
To the Director of Public Health.
To the Director of Animal Husbandry.
To the Director of Industries and Commerce.
To the Inspector of Municipal Councils and Local Boards.
To the Health Department.
To the Development Department. (Planning and Development II).

Superintendent.

No.16785-P&D.II/50-5,
Development Department.
Fort St.George,
Dated the 14th July1950.

From

The Secretary to Government,
Development Department.

To

The Director-General of Industriaa and Supplies,
New Delhi.

Sir,

Sub:-Industries - Manufacture of gland products - Provision of cold storage in municipal slaughter houses.

Ref:-Your letter No.DC2/26/1/49-Pt.II/825, dated 24th February 1950.

I am directed to state that the municipalities in this State are not in a position to set up cold storage facilities in the slaughter houses under their control for the collection and preservation of animal glands and tissues. They will, however, be instructed to afford facilities to manufacturers of pharmaceutical products who are prepared to instal their own refrigerators for the purpose in the municipal slaughter houses.

Yours faithfully,

Sd/-P.S.Viswanatha Ayyar,
Secretary to Government.
